PROFILE SUMMARY

I'm a TypeScript-savvy MERN stack engineer. Since I first learned how to code in school, I had a strong enthusiasm for it. I have worked on several initiatives over the years, including LinksHub, a free resource-sharing website for developers. I gained more abilities from my contributions to LinksHub, such as problem-solving and cooperation, which will be helpful in this position.

EDUCATION

- 2023-2026
- IGNOU
- Bachelor of Computer Application

PROJECT

Chat Bot

Expressjs | OpenAI | Langchain | Pinecone | Typescript

- Utilized OpenAI's language models to generate high-quality embeddings.
- Integrated Pinecone for optimized vector storage, indexing, and retrieval.
- Implemented advanced search algorithms to enhance accuracy and performance.

Conversa

Nodejs | Expressjs | Socket.io | HTML | Javascript

- Developed a real-time chat application enabling users to create chat rooms and engage in instant messaging.
- Managed room-based chat functionalities allowing users to join, leave, and view chat history
- Designed and integrated a button for users to send live location updates to the chat room.

SKILLS

- Project Management
- Teamwork
- Time Management
- Effective Communication
- Critical Thinking

LANGUAGES

- English: Fluent
- Hindi: Native

Course App

Typescript | MongoDB | Nodejs | Expressjs | Docker | React | RTK

- Implemented user authentication and protected routes for secure access to application features.
- Integrated Docker for containerization to ensure consistent deployment across different environments.
- Implemented video streaming capabilities using HLS (HTTP Live Streaming) for optimized video delivery.
